

Int Tec Solutions

Intelligent Content Management

Int Tec Solutions Intelligent Content Management (ICM) delivers a simple, unified experience to intelligently find access and manage information from any system, without disturbing people or processes.

Find information fast

Experience true Enterprise Search to find and edit documents and information across all of your systems immediately – even on your mobile device.

Access and edit a project plan in your network folders, view agreements in SharePoint or see everything related to a customer in Salesforce without having to migrate anything.

Int Tec ICM applies artificial intelligence to classify and organise everything bases on what it is and present related information in context so you never have to remember where it's save or which version is the right one.

Adapts to your evolving needs

Int Tec ICM integrates with numerous business applications (like CRM and ERP) to deliver the functionality and flexibility your need now and in the future.

Easy to use

Int Tec ICM eliminates information silos and provide immediate access to the right content from any core business system and device.

Get up and running in weeks, not months

Int Tec ICM comes with all the powerful features businesses needs, without a highly complex deployment phase.

Flexible Deployment

Business is no longer confined to the office, so why should your data be?

Int Tec ICM allows your to securely share information on-premises, in the cloud, or a hybrid deployment.

Metadata-driven + System-neutral + Intelligent = Intelligent Content Management

Manage Information Overload

90% of the data that exists was created in the past 2 years. Is your business prepared to handle all of that data?

Store everything. Find it instantly. Access it everywhere.

Protect confidential information

It's important to keep your content safe while maintaining access.

Easily set permissions and automate data security.

Eliminate information silos

When information is fragmented into different systems it's difficult to access and combine data.

Connecting all of your existing systems (like CRM or ERP) with all of your stuff (like documents, projects, case and other information) should be seamless.

Sharing and collaborating

Sharing documents in Int Tec ICM is as easy as a right click. Whether you need to share documents outside your organisation or collaborate with colleagues, **Int Tec ICM keeps everything streamlined and organised.**

Email black holes

Don't let information get trapped in emails! Int Tec ICM integrates with Outlook.

Smart Folders know exactly what documents are and to whom they relate.

Document processing

Int Tec ICM automated workflows streamline common business processes so you can stay productive and compliant.

It's simple, quick, and built into

Compliance and Regulation

Int Tec ICM has built-in content and process management capabilities.

Organise, manage, and track every document, process, and task with ease.

People like using Int Tec ICM

The biggest challenge of deploying a new system is getting everyone to use it.

With Int Tec ICM, user adoption is never a problem because it's intuitive, accessible from all programs you use, and it just works.
